

## SSSCU Mobile Application CMA v5.9 enhancements for both iOS and Android

Available June 12, 2018

This release includes enhancements to our Consumer Mobile Application (CMA) that improve our member's experience. These enhancements include:

- **Edit Scheduled and Recurring Transfers** – Mobile users will be able to edit/update a scheduled/recurring transfer.
  - Members will now be able to view the details of the scheduled recurring transfer by tapping the list of the transfers. Also, on this screen, the option to cancel or edit the transfer will be provided.
  - Members will now be able to edit any of the characteristics of the scheduled recurring transfer. To edit in iOS, members will have to tap “Edit” from the prior screen. On Android, the member will tap the floating action button to begin the process.
- **Edit Bill Payments** – Payments are now editable
  - Members will now be able to edit all parameters of a scheduled bill payment until the payment is pending. Tapping on a scheduled payment will allow members the option to edit/delete a payment.
- **File eBill** – Members can now file eBills
  - If members pay an eBill elsewhere, they can mark it filed through the mobile app. When the member is on the eBill page, they can use “file as paid” to move the eBill series forward and remove the notification.
- **Updated User Interface for eBills** – Minor layout change
  - The “update” button has been moved to the top right as a contextual menu item.
  - The “stop eBill” button color has been updated to red
- **More Bill Pay Enhancements**
  - Mobile users can now initiate *expedited payments*\* through the app. This payment option will be presented when the member is creating their payment.  
\*There are fees for expedited payments.
- **iOS 10.3.3 is now the minimum supported operating system for iOS**
